In addition to the six turbines previously reported in the Chorzow pow plant, the following two turbines have been identified:  A. One old-stype turbo-generator with a capacity of 15,000 KW. This machine was constructed and delit to the plant during the 1920's.  B. One topping (Vorschalt) turbine with twin generators. This machine has a capacity of 10,000 KW.  It was delivered to the Chorzow plant 1940	STATE
Chorzow Power Plant in Chorzow III  NO. OF PAGES  NO. OF ENCLS.  (USED BLOW)  SUPPLEMENT TO REPORT NO.  THIS IS UNEVALUATED INFORMATION  THIS IS UNEVALUATED INFORMATION  THIS mandation or must been identified:  A. One old-stype turbo-generator with a capacity of 15,000 kW. This mandate was constructed to the plant during the 1920's.  B. One topping (Vorschalt) turbine with twin generators. This machine has a capacity of 10,000 kW.  It was delivered to the Chorzow plant  A total of eight turbines are located in the plant and all eight have n been identified. All were in operation in April 1955, with the exception of one 45,000 kW AEG machine, which was undergoing repairs. Its turbin haldes were being changed. The machine was expected to resume operation of one 45,000 kW AEG machine, which was undergoing repairs. Its turbin ments the information included in the previous reports. The Chorzow populant in question in all three reports is not the power plant statched the Chorzow introgen plant. It is believed that the address of the pow plant mentioned in the three reports is:  Elektrownia Chorzow  Chorzow III ul. Sklodowskiej #3
